Useful links	Description
How to earn the certification	Some certifications only require passing one exam, while others require passing multiple exams.
Your Microsoft Learn profile	Connecting your certification profile to Microsoft Learn allows you to schedule and renew exams and share and print certificates.
Exam scoring and score reports	A score of 700 or greater is required to pass.
Exam sandbox	You can explore the exam environment by visiting our exam sandbox.
Request accommodations	If you use assistive devices, require extra time, or need modification to any part of the exam experience, you can request an accommodation.
Take a free Practice Assessment	Test your skills with practice questions to help you prepare for the exam.

Updates to the exam

Our exams are updated periodically to reflect skills that are required to perform a role. We have included two versions of the Skills Measured objectives depending on when you are taking the exam.

We always update the English language version of the exam first. Some exams are localized into other languages, and those are updated approximately eight weeks after the English version is updated. While Microsoft makes every effort to update localized versions as noted, there may be times when localized versions of an exam are not updated on this schedule. Other available languages are listed in the **Schedule Exam** section of the **Exam Details** webpage. If the exam isn't available in your preferred language, you can request an additional 30 minutes to complete the exam.

Note

The bullets that follow each of the skills measured are intended to illustrate how we are assessing that skill. Related topics may be covered in the exam.

Note

Most questions cover features that are general availability (GA). The exam may contain questions on Preview features if those features are commonly used.

Skills measured as of April 30, 2025

Audience profile

This exam is designed for you, if you're looking to demonstrate foundational-level knowledge of cloud-based solutions to facilitate productivity and collaboration among on-site, remote, and hybrid workers. As a candidate, you may:

- Have knowledge of cloud-based solutions.
- Be new to Microsoft 365.

You can use this exam to prepare for other Microsoft certifications, but it's not a prerequisite for the related ones.

As a candidate, you should be able to recommend Microsoft 365 solutions that address common organizational IT challenges. You should understand how Microsoft 365 solutions:

- Improve productivity
- Facilitate collaboration

- Optimize communications
- Help secure data
- Identify and facilitate compliance

You should be able to recommend solutions for:

- Endpoint and application management
- Desktop virtualization
- Automated operating system deployment
- Reporting and analytics

You should be familiar with Microsoft 365 licensing, deployment and migration assistance, and support options for organizations looking to maximize their investment in the cloud.

Skills at a glance

- Describe cloud concepts (5–10%)
- Describe Microsoft 365 apps and services (45–50%)
- Describe security, compliance, privacy, and trust in Microsoft 365 (25–30%)
- Describe Microsoft 365 pricing, licensing, and support (10–15%)

Describe cloud concepts (5–10%)

Describe the different types of cloud services available

- Describe Microsoft software as a service (SaaS), infrastructure as a service (IaaS), and platform as a service (PaaS) concepts and use cases
- Describe differences between Office 365 and Microsoft 365

Describe the benefits of and considerations for using cloud, hybrid, or on-premises services

- Describe public, private, and hybrid cloud models

- Compare costs and advantages of cloud, hybrid, and on-premises services
- Describe the concept of hybrid work and flexible work

Describe Microsoft 365 apps and services (45–50%)

Describe productivity solutions of Microsoft 365

- Describe the productivity and content creation capabilities of the core Microsoft 365 Apps including Microsoft Word, Excel, PowerPoint, and OneNote
- Describe the productivity benefits and capabilities of Microsoft 365 Copilot and Microsoft 365 Copilot Chat
- Describe project management capabilities of Microsoft 365 including Microsoft Project, Planner, Bookings, Forms, Lists, To Do, and Loop

Describe collaboration solutions of Microsoft 365

- Describe the collaboration and content sharing capabilities of Microsoft SharePoint, OneDrive, and Stream
- Describe the email and calendaring capabilities of Microsoft Exchange and Outlook
- Describe the collaboration and communication capabilities of Microsoft Teams and Teams Phone
- Describe the collaboration benefits and capabilities of Microsoft 365 Copilot and Microsoft 365 Copilot Chat
- Describe the employee experience capabilities of the Microsoft Viva apps
- Describe the ways that you can extend Microsoft Teams by using collaborative apps such as Whiteboard, Microsoft Planner, Microsoft Power Apps, and Power Automate

Describe device and cloud endpoint management concepts and deployment options in Microsoft 365

- Describe the endpoint management capabilities of Microsoft 365 including Microsoft Intune, co-management with Configuration Manager, Endpoint Analytics, Windows Autopilot, and

Windows Autopatch

- Compare the differences between Windows 365 and Azure Virtual Desktop
- Describe the deployment and release models for Windows-as-a-Service (WaaS) including deployment rings
- Identify deployment and update channels for Microsoft 365 Apps

Describe Microsoft 365 administration capabilities

- Describe the capabilities of the Microsoft 365 Admin center and the reports available
- Describe the capabilities of the Microsoft 365 user portal
- Describe the reports available in other admin centers such as SharePoint, Teams, and Exchange
- Describe the capabilities of the Microsoft Copilot dashboard

Describe security, compliance, privacy, and trust in Microsoft 365 (25–30%)

Describe identity and access management solutions of Microsoft 365

- Describe the identity and access management capabilities of Microsoft Entra ID
- Describe cloud identity, on-premises identity, and hybrid identity concepts
- Describe how Microsoft uses methods such as multi-factor authentication (MFA), self-service password reset (SSPR), and conditional access, to keep identities, access, and data secure

Describe threat protection solutions of Microsoft 365

- Describe Microsoft Defender XDR, Defender for Endpoint, Defender for Office 365, Defender for Identity, Defender for Cloud Apps, and the Microsoft Defender Portal
- Describe Microsoft Secure Score benefits and capabilities
- Describe how Microsoft 365 addresses the most common types of threats against endpoints, applications, and identities

Describe trust, privacy, risk, and compliance solutions of Microsoft 365

- Describe the Zero Trust Model
- Describe Microsoft Purview compliance solutions such as insider risk, auditing, and eDiscovery
- Describe Microsoft Purview Information Protection features such as sensitivity labels and data loss prevention
- Describe how Microsoft supports data residency to ensure regulatory compliance
- Describe the capabilities and benefits of Microsoft Priva

Describe Microsoft 365 pricing, licensing, and support (10–15%)

Identify Microsoft 365 pricing and billing management options

- Describe the pricing model for Microsoft cloud services including enterprise agreements, cloud solution providers, and direct billing
- Describe available billing and bill management options including billing frequency and methods of payment

Identify licensing options available in Microsoft 365

- Describe license management
- Describe the differences between base licensing and add-on licensing

Identify support options for Microsoft 365 services

- Describe how to create a support request for Microsoft 365 services
- Describe support options for Microsoft 365 services
- Describe service-level agreements (SLAs) including service credits
- Determine service health status by using the Microsoft 365 admin center or the Microsoft Entra admin center

Study resources

We recommend that you train and get hands-on experience before you take the exam. We offer self-study options and classroom training as well as links to documentation, community sites, and videos.
